DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/29/2008 has been entered.

Information Disclosure Statement

2. As required by M.P.E.P. 609(C), the applicant's submissions of the Information Disclosure Statement dated 03/02/2009 is acknowledged by the examiner and the cited references have been considered in the examination of the claims now pending. As required by M.P.E.P 609 C(2), a copy of the PTOL-1449 initialed and dated by the examiner is attached to the instant office action.

Terminal Disclaimer

3. The terminal disclaimer filed on 07/21/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the full statutory term of U.S. Patent Nos. 6,553,387 and 6,735,603 has been reviewed and accepted on 08/04/2006.

Allowable Subject Matter

4. After a thorough search and examination of the present application, and in light of prior art made of record, Applicant's Amendment and Examiner's Amendment made herein, claims 38-53 (Renumbered 1-16) are allowed.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

6. Authorization for this examiner's amendment was given in a telephone interview with Rene A. Pereyra (Reg. No.: 45,800) on February 27, 2009.

7. The application has been amended as follows:

Claims 21-37. (Canceled)

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

8. Claims 38 and 46 are statutory under 35 U.S.C. § 101.

Claim 38 is statutory manufacture claim that comprises specific hardware components. For example, "a computer-storage medium having computer-executable instructions" find clear hardware support in drawing (Fig. 1#27-31) and in specification

(page 9, ll. 8-20). As such claim 38 comprises specific hardware components and is statutory under 35 U.S.C. 101.

Claim 46 is statutory process claim that is tied to a specific hardware machine. For example, “logical volume” finds clear hardware support in drawing (Fig. 2#230, 235, 240, 245, 250, 255) and specification (page 14, line 16 – page 15, line 8). As such claim 46 is tied to a specific hardware machine and is statutory under 35 U.S.C. 101.

9. The primary reasons for allowance of claims 38 and 46 in the instant application is the combination of all the limitations and specifically the limitations of:

“reading an epoch value from each extent of the logical volume, the epoch value identifying a last configuration change made to the logical volume while an associated one of each extent was on line and available for access by a data manager;”

“reading a copy epoch value from each extent of a mirrored copy of the logical volume, the copy epoch value identifying a last configuration change made to the mirrored copy of the logical volume while an associated one of each extent of the mirrored copy was on line and available for access by the data manager;” and

“determining a configuration status based on the comparison of the epoch value from each extent of the logical volume and the copy epoch value from each extent of a mirrored copy of the logical volume, and the selected consistency level, wherein the configuration status indicates whether the first logical volume can be exposed as on line and available for access by the data manager.”

Prior art of record teaches RAID storage system that allocated fragmented files in distributed computer system and performs data integrity checks on the level of a volume. (*Mann*). Prior art also teaches the use of cache and fields in cache in order to indicate whether the information integrity is consistent over multiple devices. (*Shinkai*).

The current claims, particularly sections as quoted and emphasized above, are different because they relate to a different method of identifying of whether to expose logical volumes as online by using epoch value from each extent of the logical volume where the epoch value identifies a last configuration change made to logical volume while an associated one of each extent was on line and available for access by a data manager. In current claims, further, a consistency level specifies a level of consistency between the epoch values and the copy epoch values. The prior art of record neither anticipates nor renders obvious the above-recited combination.

The dependant claims (39-45), and (47-53), depending upon claims 38 and 46 respectively, are also distinct from the prior art, since they incorporate the limitations of claims from which they depend.

An updated search for the prior art in EAST database and on domains (NPL-ACM, Google, Google Scholar, NPL-IEEE) has been conducted. The prior art searched and investigated in the database and domains does not fairly teach or suggest the teaching of the newly amended claimed subject matter as described above and reflected by the combined elements in the independent claims 38 and 46.

The prior art of record neither anticipates nor renders obvious the above-recited combination.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
